DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:
 - I. claims 1-15, drawn to a method of inhibiting apoptosis or protecting against DNA damage in a cell, comprising contacting the cell with an apoptosis inhibitor of colostrinin, a constituent peptide thereof, an active analog thereof or a combination thereof, classified in class 514, subclass 2, and 424, subclass 9.1.
 - II. claims 16-19, drawn to a method of reducing the toxic effect of β -amyloid on a cell, comprising contacting the cell with a compound of colostrinin, a constituent peptide thereof, an active analog thereof or a combination thereof, classified in class 514, subclass 2, and 424, subclass 9.1.
 - III. claims 20-23, drawn to a method of reducing the toxic effect of retinoic acid on a cell, comprising contacting the cell with a compound of colostrinin, a constituent peptide thereof, an active analog thereof or a combination thereof, classified in class 514, subclass 2, and 424, subclass 9.1.
 - IV. claim 24, drawn to use of a compound of colostrinin, a constituent peptide thereof, an active analog thereof or a combination thereof in the manufacture of a medicament, classified in class 514, subclass 2, and 530, subclass 350.

Should Group I be elected, applicant is required to select one (1) specific constituent peptide of colostrinin from claim 6 or 7. Each constituent peptide, which contains different amino acid sequence and has different effect, is considered patentably distinct. This is not species election.

Art Unit: 1653

2. The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I, II, III and IV are distinct from each other because the method steps and outcomes are wholly different among Inventions I, II, III and IV.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, and because inventions I-IV require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
